**PLEASE READ - THIS COULD HAPPEN TO YOU**

On April 10, 2015, the email below was sent to Elissa in our club. Earlier the same day, she had received a similar document from a different person with a different court number, but she deleted it since there was no pertinent data and she had no idea what it was about. Elissa forwarded this second email to Larry Fagan to get his opinion about it. His anti-virus software Sophos detected a virus, so he immediately replied to Elissa to delete this second email. Although the virus was for a Windows PC, had Elissa forwarded it to someone using Windows, they would have been susceptible to the virus.

Note the way she is directed to open attached Notice to Appear Zip file: "Copy of the Court Notice attached to the email." This is likely the location of the virus detected by Sophos. Larry Fagan uses Sophos as his anti-virus program for Mac as does this editor. Sophos is a free download and is for Mac OS 10.6.8 and newer:

competes with Microsoft Excel. PC Classes Online does very specific segments; the website shows the exact times during the video when each segment is presented. This makes it easy to skip to or repeat certain segments, if necessary.

## 🍏 WATCH IS HERE

If you want to see a new 🍏 Watch in person, you can go to Denver Metro Apple Stores and see and try on the 🍏 Watch if you make an appointment beforehand. Then, you can go online and order one and wait. Web chats report shipping dates in May 2015 even if you managed to order the watch online during the first few minutes the website opened on April 10 (and then crashed). Within a few hours, almost all models were sold out.

The 🍏 Watch isn't designed to replace your iPhone just yet. In fact, it depends on it. Many 🍏 Watch apps are really just displays for things running on your iPhone, and some key features aren't available if you aren't paired to an iOS device. The watch doesn't have a GPS receiver—but it can measure your steps; It doesn't have its own camera.

The watch works with iPhones 5 and up. But, Apple Stores are encouraging upgrades in iPhones to 6 or 6A to more easily accommodate the 🍏 Watch refinements.

Rumors on the web indicate that a new iPhone will be available in September 2015. Another interesting Apple merchandising special is that purchasers will be given gift cards at the Apple Store if they trade-in a non-Apple phone for a new iPhone that will work more effectively with the 🍏 Watch.

Before you order, you'll need to make a lot of decisions.

- Size of face (38mm or 42mm) \$349 up to \$10,000
- Watch material (aluminum, stainless steel, 18-karat gold)
- Face material (ion x-strengthened glass or sapphire crystal)
- Back (composite or ceramic)
- Watch strap size and kind
- Lefties are covered: the Apple Watch screen rotates; the buttons are reversed, and the watch straps switch around too
- Applecare costs extra

Don't want to wait inline or be hurried during your 15-minute window of hands-on experience at the Apple store, go to <https://lumoid.com/apple-watch> and RENT an Apple Watch. Lumoid's motto: Rent, Try, Buy. For \$45, you get to try up to 5 devices for a week, including the Apple Watch Sport.

## iPHONE AND iPad TIPS

If you inadvertently delete an email on either your iPad or iPhone, to restore your email, give your device a firm shake and a pop-up will appear asking you to choose between Cancel or Undo. Choose "Undo."

Tap the spacebar twice to enter a period and capitalize the first word of the next sentence.

If you need to use some diacritical or international marks, **press** and **hold** the letter, then **slide** to select the proper mark (do not lift up your finger or the choices will disappear). The following letters on our iPad/iPhone keyboards have diacritical choices: a e i o u c l n s y z ? ! . \$ & % 0. Note: You can make these international marks with both lower case letters and capital letters.

Watch this YouTube video of Commander Suni Williams giving a tour around the International Space Station at the end of Expedition 33 on November 18, 2012. When she finishes this 25-minute video, she will depart the ISS aboard Soyuz TMA-06M spacecraft to return to earth following a 127-day stay aboard the space station. The photographer floating around after her is Kevin Ford who becomes the Space Station Commander when Suni Williams boards the Soyuz TMA-06M,

When this video was posted, Williams had spent a total of 322 days in space on two missions; she ranks sixth on the all-time U.S. endurance list and second all-time for a female. With 50 hours 40 minutes, she also holds the record total cumulative spacewalk time by a female astronaut.

Just think, on your iPhone and iPad, you can now write "voilà" or "¿Cómo está usted?" or the € for Euro.
