Arvada, CO 80004-2223

SCREENIUM 1.1*Joyce Etherton*

(Note: **Screenium** will be the subject of DAPI August 2009 Mac SIG meeting)

While taking a "One to One" course at a local Apple store, DAPI member Kathy Cusack was concerned about remembering everything she was being taught. She was writing frantically to document the new information when another instructor suggested **Screenium**, an application that would record the instructor's voice as well as everything that was being demonstrated on screen. With Screenium, Kathy can return to her private tutoring lesson on her computer to reinforce her lessons. Below is the description of this program. Note the Demo Video available online.

Quickly make live videos of your Mac's screen... capture everything that's happening there, including mouse pointer, selections and movements - in real-time! Since the very first release of Screenium, we support virtually any resolution your Mac is capable of: you can capture just small excerpts of your screen or even Full HD video and even higher resolutions.

Describe what you are doing on-screen, with on-the-fly voice recordings and iSight Picture-in-Picture. Simply use the built-in microphone or iSight. Any external audio input device and QuickTime-compatible webcam are also fully supported. For the more creative tutorials, you can capture Movie-in-Movie. Screenium records your screen just like it is - including ongoing video playback, in multiple windows.

- Screencasts made easy
- Video Capturing
- Audio Recording
- HotText
- Other Features
- Demo Video

- * License: Shareware, \$20
- * Author/Publisher: Synium Software
- * Modification Date: April 4, 2009
- * Requirements: Mac OS X 10.4 or higher

Download Universal Binary File Size: 11.9 MB

<http://www.synium.de/products/screenium/index.html>

**WARRANTY HERO 1.2.5**

If you're one who keeps warranty information on products you buy, this cheap (\$10) application might be very helpful. With this update, there is a 30-day, full-featured demo available. Mac OS 10.5 is required.

	Cyberhome DVD Player	8 hours and 7 minutes warranty left
	Price: \$ 19.00	Serialnumber: No serialnumber entered
	TiVo TiVo III	5 days and 8 hours warranty left
	Price: \$ 199.00	Serialnumber: OBHE88HJW-HOJNEZGGG649
	Miele Washing machine	4 months and 20 days warranty left
	Price: \$ 450.00	Serialnumber: S61FG56R3345-75D7G8I5H4
	Philips Toaster	11 months and 8 days warranty left
	Price: \$ 60.00	Serialnumber: PT009-CL89A7-LKKKL#

Here are some of the features:

- **Remind Me** automatically sets up a Calendar in iCal
- Fast entering of new purchases is easy
- Receipt Managing—attach the receipt to product by drag & drop.
- Use iSight camera to take photo of product and receipts and turn data into a PDF containing all products.
- Export to CSV (comma separated value) file which can be opened by spreadsheet apps like Numbers

- Introduction

ABOUT FIND ANY FILE, VERSION 1.2.1 ★★★★★

[Find Any File - 1.2.1](#) is a highly-rated five-star free application that searches your local disks for file properties such as name, dates, size, type or creator with unique features:

- Uses new hierarchical view of found items making it easier to browse 100s of items
- Can run as root user, finding any file on your disk, even those hidden from normal users

Contrary to Spotlight, it does not use a database but instead uses the file system driver's fast search operations, where available. This lets you search for file properties such as name, dates, size, etc., but not for file content (use Spotlight for that).

Find Any File can find files that Spotlight doesn't, e.g., those inside bundles and packages and in inside folders that are usually excluded from Spotlight search.

Finally, it is fast. Not always as fast as Spotlight, but faster than other, similar file search tools you might find for the Mac.

FORWARDING MULTIPLE EMAILS

If you have a need to forward more than one email message in Mail, it's amazingly simple. Just select all of the messages you'd like to forward—using the Shift (for multiple contiguous messages) and/or Command (for single messages) keys as necessary to

make your selection. Then select Message -> Forward (or press Shift-Command-F). A new message window will appear with the contents of every selected message, including their basic headers, and the words 'Begin forwarded message' above each one.

Fill in the recipient and subject, click Send, and you're done. (You can also conserve paper when printing multiple messages, if you're into the printed word.)

1933 – 2009

Wes Shalamon
Taken on top of Grand Teton about 35 Years Ago

From Denver Apple Pi, we send condolences to the Schalamon family. We have fond memories of Wesley Schalamon, our Apple II Librarian and friend. We'll miss his quiet, kind, soft-spoken presence at our Board meetings.

CROSSOVER MAC

www.codeweavers.com

Note: if you have any interest in this software described below, please notify Elissa at elissamc@comcast.net so we can try to schedule an iChat demonstration.

CodeWeavers is the maker of CrossOver Mac, an innovative compatibility solution that allows you to run Windows software on your Intel Mac without needing a Windows OS license. CrossOver Mac runs many popular Windows titles, such as MS Office 2007 (including Outlook 2007), Quicken, Team Fortress 2, Counterstrike, and many others.

CodeWeavers has recently begun offering short (20-30 minute) demonstrations via iChat, and have found this to be an effective method of showing off the software, answering questions, and just generally connecting with end users. So, if you're looking for some content for one of your meetings, we'd love to do a demo for your group. Not only that, but we'll cheerfully kick in serial codes for two (2) copies of our CrossOver Mac Professional version, that you can use as door prizes for your members or however you choose.

KLIX RECOVERS DELETED PHOTOS AND MOVIES

Joyce Etherton

[Klix](#) 1.0.2 recovers deleted photos and movies from memory cards. Works with OS 10.2 – 10.5. If you have deleted photos, reformatted the disk and then discovered to your horror that you erred, this is the program for you. This JoeSoft product has a 5-mouse rating—the best there is. The software works with most USB or FireWire cameras except xD memory cards after they've

been formatted in an Olympus or Fuji camera.

Read about the remarkable recovery at http://www.macworld.com/article/140290/2009/06/klix.html?lsrc=nl_mwgems_h_crawl.

RECYCLING INKJET AND LASER CARTRIDGES

[eCycle Group](#) will pay our club for used and unused (virgin) inkjet and laser cartridges. Although they don't accept some brands and kinds, they do take most of the ones our club members bring for recycling. Elissa has been our tireless agent for collecting, sorting and shipping all the recycle cartridges we bring. If you want to check for yourself what eCycle will accept, go to the link above and search for your (1) type, (2) brand, and (3) model. It will save Elissa some time and it will familiarize you with the process. Bring your cartridges to be recycled to the next meeting.

HELP SIG MEETING NEW GUIDELINES

Joyce Etherton

We've had such successful(!) Help SIG gatherings recently that we're going to have to proceed in a slightly different fashion. We have a limited number of people who can help fix some of the complex problems and therefore there needs to be a time limitation set so more members can be helped. So, as before, please notify Elissa before the meeting so that our fix-it people can have the proper software/hardware and any required internet access.

Now the changes.

- If you have more than one problem, **prioritize**. Your first problem will be addressed. Then it's the next guy's turn. If the next guy has several problems, he/she too must prioritize and the first problem will be addressed. Get the drift? If there is time remaining, your secondary problems can be reviewed.
- We do have internet access now, which is a major improvement, but only one computer can be online at a time. If your problem requires internet access, your time may be limited so that others may also get access for their requirements.
- A sign-in sheet may also be implemented to facilitate an orderly process.

Not so bad, huh?

Occasionally, some of us who aren't **inhouse geniuses** can help. But we can all learn new things from each other. It's really a fine opportunity to just learn about what our Macs can do—and even what they can't do.

Denver Apple Pi Membership Information

Denver Apple Pi (DAPi) is an Apple Computer Users Group, not affiliated with Apple Computer, Inc. The SEED is an independent publication not affiliated or otherwise associated with or sponsored or sanctioned by Apple Computer, Inc. The opinions, statements, positions and views stated herein are those of the author(s) or publisher and are not intended to be the opinions, statements, positions or views of Apple Computer, Inc. Articles, stories, and other items in the SEED may be copied or used by other clubs or groups as long as credit is given to Denver Apple Pi and the author of the article. On reprints, please also include the date or volume number from the SEED.

MEMBER BENEFITS INCLUDE: MONTHLY MEETINGS: information, new product announcements, door prizes when available, share ideas with other members, and copy programs from the Disk Libraries. PROGRAM LIBRARIES: Over 900 public domain programs, GS Library on 3.5" disks or on a 100 MB ZIP disk, Mac disks available in HD, ZIP and CD formats.

MEMBERSHIP DUES are \$20.00 per year for a monthly hard copy of the SEED and \$15.00 per year for a monthly pdf copy. Fill in the form below or ask for an application to send with your check to the Club mailing address:

DENVER APPLE PI, 6501 Welch Ct, Arvada CO 80004-2223

Elissa McAlear: call 303.421.8714 for information about Apple II, GS and Mac. Email elissamc@comcast.net

Our website is: <www.denverapplepi.com>

Macintosh SIG meets the THIRD Tuesday of the month, 7:00 to 9:00 p.m.
 Troubleshooter Group Mac Help meets the FOURTH Wednesday of each month, 7:00 to 9:00 p.m.
 SEED articles should be mailed to jjetherton@comcast.net, subject: "SEED Article"
