RUSSIA'S RICHEST MAN PURCHASES APPLE STOCK

In late April 2013 with Apple's stock price at its lowest levels since 2011, Russian billionaire Alisher Usmanov, one of the main investors behind the Digital Skies Technologies investment group, has purchased $100 million of Apple stock.

"When the company lost $100 billion of its market value, it was a good time to buy its shares, as the capitalization should rebound."
Usmanov is estimated to be Russia's richest man with a fortune worth $19.8 billion.

WHERE THE WEB WAS BORN

Tim Berners-Lee, a British scientist at CERN, invented the World Wide Web (WWW) in 1989. The web was originally conceived and developed to meet the demand for automatic information-sharing between scientists in universities and institutes around the world.

On 30 April 1993 CERN published a statement that made World Wide Web ("W3", or simply "the web") technology available on a royalty-free basis. By making the software required to run a web server freely available, along with a basic browser and a library of code, the web was allowed to flourish.

PayPal Executive Looks for Apple to Adopt Fingerprint Sensors, Lead Charge Away From Passwords

"It's widely rumored that a large technology provider in Cupertino, Calif., will come out with a phone later this year that has a fingerprint reader on it," he said. "There is going to be a fingerprint enabled phone on the market later this year. Not just one, multiple."

USEFUL TOOL ON YOUR iPAD, iPHONE OR iPOD TOUCH

Open Safari on your device and start browsing the web. Go to a few of your favorite sites. When the arrow(s) appears indicating you've been on several different sites, put your finger on the arrow until a menu pops up and select whichever site you'd like to go back to.

Internet Slang.com

Just to keep you up to date on the latest internet acronyms, included is a link for you to look up not only what slang you're looking for, you can view "the Top Ten most popular slang look ups today," and with another click you can view fifty more top terms. Reminds me of our college dormitory phone-call chalkboard. What started all this was the ominous looking "FUD" comment by a reader about something Microsoft was doing. My first thought was, WDYMBT, so I Googled FUD (Fear, Uncertainty and Doubt) and discovered the website dedicated to **Internet Slang.com.**

🍎🍎🍎🍎

TURN OFF SAFARI TRACKING IN PREFERENCES

Safari keeps track of the Web sites you've visited so you can jump to that particular site later. However, if you don't like the idea of Safari keeping track of the sites you've visited, you can tell Safari to automatically clear your history at periodic intervals.

Just load Safari, click the Safari menu, and choose Preferences. When a Preferences dialog appears, click in the "Remove history items" pop-up menu and choose a setting such as After one day or After one year.

BIG CHANGES COMING TO APPLECARE

AppleInsider reports there will soon be changes to how iPhones will be repaired. The current policy of exchanging the device with a like-new replacement if there is anything wrong with an iPhone, iPod, or iPad will change to actually repairing the products and returning the same device to the customer.

Current repair policies are to replace speakers, receivers, home buttons, and vibrator motor and battery. However, in June, this repair service will expand to display replacement, and by July, cameras, sleep/wake buttons and logic boards will be dealt with in-store. New advanced diagnostics tools will allow employees to remotely assess hardware issues and relay the data directly to the technicians, allowing for quicker turnaround times.

These new in-house repairs are to be introduced across the US first and international support coming online soon thereafter. This change in service is expected to save Apple nearly $1 billion per year.

Another change will be to reconfigure the paid AppleCare service as a subscription model, or introduce a new tier, which will be attached to a customer rather than a specific product. In this new system, a customer is entitled to in-store training similar to the One to One program available to new Mac buyers with each device owned being covered by the warranty. The new Apple care may also include "exclusive" 24/7 support, although this hasn't been confirmed, and pricing is not yet fixed.

The number of Technical advisors who currently work from home will be increased from 4,200 to probably twice that number. This is also meant to cut overhead costs and provide for a larger pool of potential employees.

Online resources will also likely be ramped up to include support over iMessage and a revamp of the Support Pages website. This may focus on interactive tutorials and video content for both computer and iOS devices.

IN QUICK TIME PLAYER, SPEED FORWARD BY CLICKING ARROWS

If you are watching videos using the QuickTime Player, you can increase the speed by clicking the double forward arrow button in the controls. Click once for 2X, again for 4x, again for 8x. You can also use the keyboard shortcut Command+Right Arrow. Use Command+Option+Right Arrow to increase the speed by 0.1x. Use the double rewind arrow button or Command+Left Arrow to play the video in reverse.

QUICK LOOK REVIEW: SATELLITE SAFARI FOR IOS IS STELLAR, INSPIRING

Satellite Safari is a realtime, visual guide to hundreds of satellites in orbit. This universal iOS app will tell when they pass overhead and where they are right now. You can follow along in orbit, with the satellite, see what it looks like, look at the ground track or watch it pass overhead from your location on the ground. It's also the official app for the Kickstarter SkyCube mission.

Satellite Safari 1.1, Southern Stars Software

List Price: US$4.99

Pros: **Beautiful visual representation and technical data for satellites, overhead pass predictions, several different views, satellite fly-around, authoritative. Excellent documentation.**

DAPi Recycles

Bring Your Empty Inkjet and Toner Cartridges to Meetings

DAPi normally nominates and votes for Board candidates one month earlier—in April and May—for the following year. Because we didn't have our April meeting due to inclement weather, we're going to have nominations in May and the election in June. See the slate of candidates on Page 2. Please feel free to nominate yourself or someone else from the club who is in good standing.

Give your ideas for subjects for upcoming meetings, also on Page 2.

Denver Apple Pi Membership Information

Denver Apple Pi (DAPI) is an Apple Computer Users Group, not affiliated with Apple Computer, Inc. The SEED is an independent publication not affiliated or otherwise associated with or sponsored or sanctioned by Apple Computer, Inc. The opinions, statements, positions and views stated herein are those of the author(s) or publisher and are not intended to be the opinions, statements, positions or views of Apple Computer, Inc. Articles, stories, and other items in the SEED may be copied or used by other clubs or groups as long as credit is given to Denver Apple Pi and the author of the article.
